Consent for Chiropractic Treatment & Acknowledgment of Receipt of Information

To the patient: Every type of health care is associated with some risk of potential problem. Health care providers, including chiropractors, are required, by law, to tell you the nature of your condition, the general nature of treatment, the risks involved, and the reasonable therapeutic alternatives.

In keeping with the Florida law of informed consent, you are being asked to sign a confirmation that we have discussed all these matters. We have already discussed with you the common problems and risks. Please read carefully. Ask about anything you don't understand, and we will explain it.

In general, chiropractic treatment includes examination, taking of x-rays, manipulation/adjustment, and application of physical therapy modalities. Although their occurrence is extremely remote, some risks are known to be associated with these procedures. These include:

1) Stroke: is the most serious problem associated with spinal manipulation. The results can be temporary or permanent dysfunction of the brain, with a very rare complication of death (1 in 20 million). Spinal manipulations have been associated with strokes that arise from the vertebral artery (located in the neck vertebrae). (This problem occurs so rarely that there is no conclusive data to quantify probability.)

2) Disc Herniations: that create pressure on the spinal nerve or spinal cord are frequently successfully treated by chiropractors. Rarely, treatment may aggravate the problem, resulting in increased low back pain, radicular pain and numbness of a transient nature. Residuals may last for a few days but seldom for longer periods of time.

3) Soft tissue injury: Soft tissue primarily refers to muscles and ligaments. Muscles move bones and ligaments limit joint movement. Rarely, treatment may injure some muscle and ligament fibers. The result is temporary increase in pain and necessary treatments for resolution, but there are no long term affects for the patient.

4) Rib fractures: The ribs are found only in the thoracic spine or middle back. Rarely, a manipulation will fracture a rib bone. This occurs only on patients who have weakened bones from such things as osteoporosis. Osteoporosis can be noted on your x-rays. We adjust all patients carefully, especially those who have indications of osteoporosis on their x-rays.

I hereby authorize and direct Rob Thomson DC, together with associates and assistants of his choice, to provide chiropractic treatment including examination/diagnostics, spinal manipulation/adjustment, various modes of physical therapy, x-rays and any additional procedures or services that may be deemed necessary or reasonable. This treatment has been explained to me, and alternative methods of treatment (if any) have also been addressed. I have read and understand all information set forth in this document, including any attachments. I acknowledge that I have had the opportunity to ask any questions about the contemplated procedure and that my questions have been answered to my satisfaction. This authorization for and consent to chiropractic treatment is and shall remain valid until revoked.

APPOINTMENT REMINDERS AND HEALTH CARE INFORMATION AUTHORIZATION

Your chiropractor and members of the practice staff may need to use your name, address, phone number, and clinical records to contact you with appointment reminders, information concerning treatment alternatives, or other health related information that may be of interest to you. If this contact is made by phone and you are not at home or work, a message will be left on your answering machine, with a family member, friend, co-worker or employer. In addition, by signing this form you are giving us authorization to contact you with these reminders and information.

You may restrict the individuals or organizations to which your health care information is released or you may revoke authorization to us at anytime; however, your revocation must be in writing and mailed to us at our office address. We will not be able to honor your revocation request if we have already released your health information before we receive your request to revoke authorization. In addition, if you were required to give your authorization as a condition of obtaining insurance, the insurance company may have a right to your health information if they decide to contest any of your claims.

Information that we use or disclose based on authorization you are giving us may be subject to re-disclosure by anyone who has access to the reminder or other information and may no longer be protected by federal privacy rules.

You have the right to refuse to give us this authorization. If you do not give us authorization, it will not affect the treatment we provide to you or the methods we use to obtain reimbursement for your care.

You may inspect or copy the information that we use to contact you to provide appointment reminders, information about treatment alternatives, or other health related information at anytime. (164.524)

This authorization will expire seven years after the date on which you last received services from us.

I authorize you to use or disclose my health information in the manner described above.
